### Inspecting New War Machines

Secretary of War Baker is inspecting the latest in U. S. army machines of war. Above he is shown on top of one of the new tanks looking over the guns. Below he is running the new Ford tractor. It looks much like a Ford runabout with extra wheels and tractor attachment.

### Uncle Sam<sup>MD</sup>

Send health questions to Information Editor, U. S. Public Health Service, Washington, D. C. Give name and address and you'll receive a personal reply.

#### Constipation

My little girl, five and one-half years old, is very badly affected with constipation. She never had a movement only with cathartics, and then they cease to help after a while. I have to give her enemas.

Orange juice and prunes are excellent. Include oatmeal, fresh vegetables and fruits, with plenty of water to drink between meals. A teaspoonful of raw bran added to the oatmeal is often very beneficial. Train her in the habit of regular bowel movement.

#### Tubercular Germs

Are tubercular germs alive after they are eliminated from the system? I mean tubercle bacilli which are swallowed.

Yes, they are very much alive, and this is one more reason why persons should be very careful about all their discharges.

#### Cats

My little boy is very fond of cats. Is there any danger of his becoming diseased from playing with them?

The danger is very slight, probably

no greater than the danger from contracting communicable disease from dogs.

#### Sciatica

I have had sciatica for three years. For the past year I have lost 25 or 30 pounds of flesh although my sciatica is some better than it was 12 months ago. What could cause my loss of flesh?

Sciatica alone would not account for your loss of weight. Since this may indicate some serious disturbance or constitutional disease. The pelvic organs should be examined to determine whether any pressure is being exerted in this region. If you have rheumatism or gout, treatment will be directed towards the constitutional conditions. In some cases rest in bed with fixation of the limb is beneficial, but your physician will be able to decide what is best in your particular case.

## Well

### What Do You Think of This?
